msg.PAW (Product Analysis Workbench)

Boost Efficiency in Product Testing

msg.PAW, designed as **P**roduct **A**nalysis **W**orkbench, is a JAVA-based tool which complements our msg.PM (Product Manager) solution by offering automated and comprehensive options for product testing of your insurance product portfolio.

We Understand Your Challenges

Vast portfolios: Testing extensive range of products and product variants.

Comprehensive coverage: Ensuring all-encompassing test scenarios (functional & technical).

Decision making: Calibrating product parameters (e.g. pricing).

Time-to-market: Frequently changing product portfolio.

Why Run msg.PAW

Various scenarios: Supports product pricing, sensitivity & what-if analysis, regression and more.

Automation: Increases efficiency with automated test setup and CI/CD support.

Adaptability: Flexibly connects to various input formats and provides convenient output options.

Scalability: Handles large input portfolios with minimal effort including automatic comparison.

Delivery quality: One-click automated regression testing enables fast-release product cycles.

What makes msg global unique

Global Expertise

Diverse consultant network with deep knowledge.

Proven Success

Skilled resources and 15+ successful implementations of msg.PAW.

Innovative Solutions

Recognized SAP Pinnacle Award Winner.
