

A Ready-to-run ERP for Banking

 msg.Banking for SAP Cloud ERP

SAP S/4HANA Cloud®

Public Edition

Starter Package

With **SAP S/4HANA Cloud, Public Edition**, you get a ready-to-run cloud ERP system that combines the latest innovations with the cost efficiency of the cloud and a comprehensive set of functionalities. SAP S/4HANA Cloud, Public Edition, is the **core component of the GROW with SAP** offering, keeping you aligned with current market trends and challenges.

By leveraging the standardized system architecture of the Public Cloud, you benefit from:

- **Lower Total Cost of Ownership (TCO)**
- **Continuous access** to innovations
- Industry-specific functionality with **proven processes** to support your business transformation

Empowering Captive Finance Institutions

With msg.S/4Banking Public Cloud, we bring industry-specific expertise to help captive finance institutions maximize the value of SAP S/4HANA Cloud Public Edition.

Our tailored solution addresses key financial and accounting challenges faced by captive finance institutions, enabling them to optimize processes, improve efficiency, and focus on delivering exceptional customer experiences. Built on SAP S/4HANA Best Practices, our **msg.Banking for SAP Cloud ERP pre-configured solution** delivers functions and processes that are fully tested and validated

Our approach integrates the robust capabilities of SAP S/4HANA Cloud with msg global deep expertise in captive finance, ensuring your business achieves:

- **Streamlined operations** across financial and accounting processes
- **Agility and scalability** to adapt to evolving business needs
- **Simplified IT landscapes**, enabling you to focus on core business growth

By leveraging msg.Banking for SAP Cloud ERP alongside GROW with SAP, your captive finance company can evolve into a future-ready and efficient enterprise.

Service Scope

With msg.Banking for SAP Cloud ERP, you gain a pre-configured ERP solution in the cloud.

A subledger component enables real-time recording of all business transactions, manages subledger and general ledger postings, and ensures accurate financial processing.

Financial and Operational Excellence

- **Fully integrated system** – Recording all business transactions in a system integrated with all company operations ensures accurate and complete accounting data
- **Centralized accounting solution** – Centralized accounting data provides a single unified source of financial information, improves consistency, helps streamline reporting, reduces errors and ensures better control and compliance
- **Auditability and traceability** – Every transaction can be tracked from origin to final entry, making processes clear and verifiable

Additional Project Execution is ensured by

- Blueprint document
- Business process flows
- Configuration settings
- Master data templates
- Best practice project management in SAP Cloud ALM (Application Lifecycle Management)

Why choose msg.Banking for SAP Cloud ERP?

- **Tailored for Captive Finance** — Designed for captive finance institutions, this solution focuses on improving accounting process and increasing efficiency
- **Proven SAP Platform with msg Expertise** — Combines the power of SAP S/4HANA Cloud Public Edition with msg global deep captive finance industry expertise
- **Scalable and Cost-Effective** — A cloud-based captive finance solution that scales with your business needs, reducing infrastructure costs and IT maintenance burdens
- **Continuous Innovation** — Stay ahead of the competition with biannual updates that deliver new accounting features, tools, and optimizations
- **Faster Time-to-Value** — Pre-configured best practices and streamlined implementation processes reduce deployment times, helping you realize value sooner

Value Proposition for You

- **Fixed starter pack** implementation price
- A **complete native SaaS ERP solution** with all the advantages of the Public Cloud
- The fastest path to **innovation and reduced TCO**
- **Short project timelines** by leveraging standardized SAP best practices
- **Lower operational costs** and minimal maintenance requirements, freeing up IT budgets for other projects
- **Process-oriented interface and user-friendly handling**
- Regular updates, system maintenance, and backups provided as part of the **SaaS model**

Challenges

The captive finance industry faces significant challenges adapting to today's digital and regulatory landscape. Digital transformation demands faster and more flexible operations. Captive finance must modernize core systems, deliver seamless digital experiences, and meet compliance standards - while also reducing operational costs and boosting agility.

Common challenges faced by captive finance:

- Outdated systems that limit scalability and innovation
- High level of operational costs
- Inefficient processes – increase manual steps, hinder performance and obstruct modernization efforts
- Limited visibility into real-time financial and insights
- Tightening regulatory and compliance requirements

Highlights

- Standardized system architecture in SAP S/4HANA Cloud, Public Edition
- Pre-configured ERP systems with industry-specific functionalities
- Guided implementation under the GROW with SAP framework
- Flexible monitoring and reporting, including dashboards and graphics
- Intuitive and user-friendly interface
