

SUPPLIER AND PURCHASING POLICY

msg global has implemented a Management System through which it controls all aspects related to Quality. This system includes communicating the Quality Policy and Requirements applicable to our suppliers and subcontractors, without whose collaboration we would not be able to guarantee the implementation of our principles in the development of our work.

We also inform you that, as a requirement of our purchasing process in accordance with ISO 9001.2015, we continuously evaluate our approved suppliers, where the contracted products and services are inspected by the area manager in accordance with the contractual requirements (quality, documentation, delivery times, incidents, etc.). Performance in this evaluation will determine approval or removal from our supplier and subcontractor program.
