

# msg.Event Data Retrieval (EDR)

## Unlock Accurate Crash Insights

msg.EDR provides automated accident data retrieval and analysis, enabling insurers and authorities to reconstruct incidents, identify fault, and detect fraud efficiently.

### TYPICAL CHALLENGES

- **Fraud risk:** False or exaggerated claims complicate assessments.
- **Data gaps:** Lack of concrete accident data hinders fault determination.
- **High costs:** Expert assessments are expensive and time-consuming.
- **Technical info absence:** Missing car performance data impedes investigations.

### KEY BENEFITS

- **Immediate Access:** Retrieve crash data within minutes.
- **Accurate Reconstruction:** Detailed event analysis pre- and post-collision.
- **Fraud Detection:** Identify false claims swiftly.
- **Cost Efficiency:** Pay-per-transaction model reduces expenses.
- **Ease of Use:** No specialist knowledge required.

How can  
**msg global**  
support you

- **Expertise:** Recognized SAP Pinnacle Award Winner with deep industry knowledge.
- **Innovation:** Continuous R&D ensures cutting-edge solutions.
- **Global Reach:** Comprehensive support from strategy to optimization worldwide.
